Adjustable Position Electromagnetic Drill Press with 3/4IN Motor

CATALOG (SKU) NUMBER: MI-4206-1

The Adjustable-Position Electromagnetic Drill Press with ¾” Motor features the 4203 adjustable-position, variable-speed base and the 4262-1 3/4-in drill motor with 3-Jaw chuck. Built for production drilling, this 11.5-amp drill press can handle the toughest drilling jobs with up to a ¾” Twist Drill hole capacity, 4" hole capacity with Steel Hawg® Cutters and 1"-14 tapping capacity. The motor runs at 350 no-load RPM, geared low for maximum torque; base control panel offers variable speed control of motor RPM.. It can produce up to 1670 pounds of drill point pressure with a 1-inch steel plate. Feedback speed control helps you maintain speed during operation. This unit features a ¾” chuck for fast and easy bit changes while eliminating slippage and breakage. The dual-mount gear case with reverse mount permits tight quarter drilling.
