Fluid Film - Lubricant and Corrosion Protection

CATALOG (SKU) NUMBER: FLF

FLUID FILM products offer powerful corrosion protection for all metals and superior lubrication for all moving parts. They are long lasting, thixotropic liquids and gels that have been used for over 55 years in the highly corrosive marine environment of ships and offshore drilling rigs. More recently they have been introduced and successfully utilized in the lawn & garden, aviation and automobile industries, as well as providing an environmentally friendlier solution for home maintenance. Facilities where they are used include government, commercial fishing, gas companies, farming, salt, power, and industrial plants.

FLUID FILM is formulated from specially processed wool-wax, highly refined petroleum oils and selected agents to provide corrosion control, penetration, metal wetting and water displacement. These long lasting products contain no solvents, will not dry out and will penetrate to the base of all metals, providing corrosion protection from both natural and industrial atmospheres. Heavily corroded and/or frozen parts such as nuts, bolts, shafts, etc. that would normally be damaged during maintenance, can be salvaged by applying FLUID FILM.

Product Specifications

Fluid Film		
Part Number	Application	Size
FLF-001	Lubricant/Corrosion Inhibitor	11.75oz
FLF-002	Lubricant/Corrosion Inhibitor	1 gallon
FLF-003	Lubricant/Corrosion Inhibitor	5 gallon
FLF-004	Gel BW Lubricant/Corrosion Inhibitor	5 gallon
FLF-005	Wire Rope Lubricant (Extreme Pressure)	5 gallon
FLF-A55	Wire Rope Lubricant/Corrosion Inhibitor	55 gallon
