

Hard Hats

CATALOG (SKU) NUMBER: LIFT-

We carry a premium lineup of Lift Safety hard hats built for professionals who want superior protection, comfort, and style on the jobsite. Our selection includes the popular DAX Full Brim Carbon Fiber helmets, DAX Fiber Resin full brim styles, DAX Cap Style Fiber Resin hard hats, and iDAX vented and non-vented options.

Lift hard hats are known for their lightweight feel, exceptional balance, and all-day comfort compared to traditional hard hats. Features like oversized ratcheting fit systems, moisture-wicking liners, and durable impact-resistant construction help reduce fatigue and improve wearability throughout long workdays. The carbon fiber models also provide an ultra-strong shell with a distinctive high-end finish that stands out on the jobsite.

Whether you need vented airflow for hot conditions or non-vented protection for specific safety requirements, Lift offers professional-grade options built to perform in demanding environments.

If we don't have the exact color or style in stock, we can special order nearly anything from the Lift Safety catalog.
