Pulaski Axe

CATALOG (SKU) NUMBER: VB-PA

The pulaski is a special hand tool used in wildland firefighting. The tool combines an axe and an adze in one head, similar to that of the cutter mattock, with a rigid handle of wood, plastic, or fiberglass. The pulaski is a versatile tool for constructing firebreaks, as it can be used to both dig soil and chop wood. It is also well adapted for trail construction, gardening, and other outdoor work. As a gardening or excavation tool, it is effective for digging holes in root-bound or hard soil.
