Shock Lanyard (various types and sizes)

CATALOG (SKU) NUMBER: GF-LANYARD

The Guardian Fall Protection Internal Shock Lanyard is comprised of heavy duty outer Surfacetech webbing, with a polyester core specifically designed to reduce the impact forces resulting from a fall. Because the shock absorption is built directly into the lanyard there is no need for an external shock absorber, making the Internal Shock Lanyard a particularly lightweight option. This lanyard does not stretch, except if exposed to high levels of force, and is available in single and double leg models, and with a variety of connector component options. Surfacetech webbing makes the lanyard especially easy to clean, and is resistant to dirt, mold, or other types of contamination.
